SUMMARY

UX/UI designer and Shopify developer with 4+ years of experience spanning e-commerce, digital product design, and brand identity. Owns the full design-to-development cycle — from user research and Figma prototyping to Liquid/CSS/JavaScript theme implementation and conversion analytics. Proven record of shipping measurable improvements, including a product page redesign that lifted mobile CTR by 33% and conversion rate by 23%. Experienced in cross-market e-commerce operations, marketing attribution analysis, and AI-assisted development workflows.

PROFESSIONAL EXPERIENCE

ATACZ — Vancouver, BC Jan 2026 – Present

UX/UI Designer & Shopify Developer

- Own end-to-end UX design and front-end development for two Shopify Plus storefronts (US and Canada) under a single Shopify Markets setup, supporting ~60 SKUs for a sustainable upcycling bag brand.
- Led a data-driven product detail page (PDP) redesign from research through Liquid/CSS/JS implementation, validated post-launch: +33% mobile CTR, +23% conversion rate, +51% scroll depth.
- Authored a product listing page (PLP) revamp proposal for leadership, using funnel data to focus investment on the highest-impact conversion levers with PLP-to-PDP CTR as the north-star metric.
- Built cross-platform funnel analytics using ShopifyQL, Microsoft Clarity, and Meta Ads data; diagnosed a cross-market sales decline by tracing it to ad-spend allocation and attribution issues across regions.
- Conducted a UTM attribution audit that uncovered feed-based campaigns (Meta DPA, Google Performance Max) routing Canadian traffic to the US storefront, and prioritized remediation by ROI.
- Developed custom theme features in Liquid, CSS, and JavaScript, including a metafield-driven sustainability badge system and reusable header/carousel components.
- Automated lifecycle and transactional email using Klaviyo and Shopify Flow, including a custom pre-order confirmation integration built with Flow's JavaScript runtime and GraphQL.
- Established an AI-assisted development pipeline (Claude Code, GitHub Actions, Shopify CLI) enabling automated theme deployments to staging and production.

KITS Eyecare — Vancouver, BC Apr 2024 – Dec 2025

Graphic Designer

- Led the design and rollout of an AI-powered content workflow for generating product detail page (PDP) images and videos, accelerating creative production for e-commerce.
- Developed and executed digital marketing assets, including display ads and social media graphics, enhancing brand visibility across channels.
- Contributed to UX/UI work on customer-facing digital experiences alongside core graphic design responsibilities.
- Collaborated with marketing and product teams to ensure cohesive brand messaging across all customer touchpoints.

Vancouver Premium Packaging — Burnaby, BC Aug 2022 – Apr 2024

Graphic Designer

- Conducted user research, wireframing, and prototyping for a full website renewal, increasing user engagement and sales inquiries by 30%.
- Led branding and packaging design initiatives, creating logos, typography, artwork, and 3D mockups for product launches.
- Produced digital campaigns and print collateral supporting sales and promotional efforts.

Sprung Studios — Vancouver, BC May 2022 – Jul 2022

Junior UX/UI Designer

- Conducted user research and usability testing to improve game UX/UI across multiple titles.

- Contributed to wireframing and prototyping, improving user satisfaction and overall experience.

Pacific Dream — Vancouver, BC Jul 2021 – Jan 2022

UX/UI Designer

- Spearheaded branding and packaging design for multiple branch launches, ensuring a cohesive visual identity.
- Crafted user personas, wireframes, and interactive prototypes for enterprise-level applications.
